DODILog

Innovating Storage, Preserving Quality, Reducing Waste

Objectives

DODILog aims to enhance agri-food logistics by integrating advanced technologies for early risk detection and quality preservation of potatoes and cereals. It supports storage facilities in adopting innovative solutions, fostering transnational cooperation, and ensuring sustainability across North-West Europe.

7 Innovative technologies

60+ stakeholders engaged in training and capacity-building

11 transnational partners

20% Less crop losses due to innovative storage

11 partners from
BE, DE, FR, NL

Cooperating from
2025 to 2027

EU funding
€3.3million

Total project budget
€5.5million
